**Subject:** Disclosure Framework Project (Topic 235)

Dear Director of Major Projects and Technical Activities at FASB,

**Bad idea - Disclosure Framework Project (Topic 235) regarding materiality of information**

I am an investor and am opposed to FASB's proposed changes to alter how materiality of info will be assessed and delivered to to the investment community.

I, myself, want to decide what info is materially useful. Confusion is not a problem; however, receiving full, accurate, timely information is.

Don't impose additional interface(s) on the quantity and/or quality of what reaches me. Please.

Sincerely,

Connye Crump
